## CLEAN

your cooling towers

## CURB

your energy costs &  
control Legionella/bacteria

## CUT

your maintenance &  
condenser cleaning routines

LAKOS is a proud member of ASHRAE,  
BOMA and the U.S. Green Building Council

**If this is your Cooling Tower cleaning system,  
you need to call us !**

Your Authorized Lakos Distributor:

# LAKOS

Separators and Filtration Solutions

# Reduce Risk of Injury, Time, and Maintenance Costs LAKOS is the Answer You've Been Looking For...

*Eliminate This !*

Grit, scale, and precipitated solids can foul even the best cooling water systems...both on open and closed system loops! This can cause problems with the heat exchangers, tower nozzles, plumbing, valves, and more importantly, the tower basin. The costs can add up quickly...and **the solution is effective filtration.**

LAKOS Separators are centrifugal-action solids removal systems that are easy to install, free of routine downtime maintenance, and offer quick payback. Some results you can expect:

- **Save 60 to 90% on your tower maintenance costs**  
Reduced tower cleaning, heat exchanger punch-outs, and labor/downtime costs.

- **Save 10% on your energy costs**

Reduced fouling improves heat exchange efficiency and controls operating costs.

- **Save 3 to 5% on water consumption**

Reduced blowdown & TDS control. Eliminates sewage discharge costs. Reduces make-up water costs.

- **Reduce chemical usage by improving efficiency**

Reduced water loss similarly helps reduce chemical treatment, and reduced solids will minimize chemical absorption or excessive chemical usage to offset the presence of solids.

- **Reduce the risk of Legionella**

A LAKOS basin cleaning installation will help to prevent the accumulation of bacteria that leads to Legionnaire's Disease.

LAKOS  
TowerClean  
System

Calculate your potential savings. Contact us for a **No-Obligation Tower Inspection** and application analysis. Take advantage of this opportunity to reduce your operating costs. We sincerely welcome your call.
