

# Submersible Pump Protection Separators

Prevents sand abrasion damage to pumps, increasing life and maintaining efficiency

# SUB-K

Systems Under 100 gpm

*Models available for both turbine and submersible pumps.*

Defend your submersible pump and water system from the abrasive, damaging and costly effects of sand with a LAKOS SUB-K Pump Protection Separator. Using controlled centrifugal action, troublesome sand is removed from the water before it enters the pump, reducing wear to impellers and other vital components.

Manufactured using our state-of-the-art injection molding techniques and industrial strength composite materials, the SUB-K features no moving parts to wear out, no screens or filter elements to clean or replace, and requires no

routine maintenance. Trouble-free and effective, LAKOS SUB-K Separators are easy to install into water wells as small as 4 inches I.D.

- Dramatically reduces sand wear
- Extends the pump's life by four times or more
- Controls excessive efficiency loss and energy costs
- Minimizes breakdowns and replacements
- Reduces downstream filtration burden

Flow range: 3 - 99 U.S. gpm (.7 - 23 m<sup>3</sup>/hr)

For higher flow rates and for all turbine pumps, refer to the LAKOS PPS Separators

## Where Does the Sand Go? Will Separated Sand Fill Up the Well?

The SUB-K Series Separator is designed to prevent excessive sand from damaging a pump. Unchecked, sand wear costs significant time and money. Instead, the separator offers a more cost-effective alternative.

Separated sand is periodically discharged deep into the well. Experience has proven that accumulation is not an issue to fear. While rare cases occur where the sand accumulation requires bailing of the well, more often the actual flow of the aquifer serves to evacuate much of the sand to prevent troublesome build-up. In addition, extensive research by Ohio State University addressed this exact concern (Water Well Journal, Oct. 1985). Their study revealed that the accumulation of some sand by a Pump Protection Separator actually changes the inflow of water into the well, creating a state of equilibrium that drastically decreases the flow of further sand into the well.

## How to Select a Pump Protection Separator

- 1 Identify your well diameter. 4" and 4.5" wells use a SUB-PAK. 5" wells and larger use SUB-K.
- 2 Find your pump's flow range. The best fit model is in the middle of the range. **DO NOT OVERSIZE.** For VFD (constant pressure/variable flow), select based on maximum flow.
- 3 Verify minimum 30' of water (submergence) above pump during operation. Verify 20' of space below the separator.

Model	Minimum Well I.D.		Flow Range		Weight	
	in	mm	U.S. gpm	m <sup>3</sup> /hr	lbs	kg
SUB-8-4-PAK	4"	102*	3 - 8	0.7 - 1.8	9	4
SUB-12-4-PAK	4"	102*	5 - 12	1.0 - 3.0	9	4
SUB-16-4-PAK	4"	102*	10 - 16	2.5 - 3.8	9	4
SUB-28-4-PAK	4"	102*	14 - 28	3.0 - 6.5	11	4
SUB-8-4.5-PAK	4.5"	114*	3 - 8	0.7 - 1.8	9	4
SUB-12-4.5-PAK	4.5"	114*	5 - 12	1.0 - 3.0	9	4
SUB-16-4.5-PAK	4.5"	114*	10 - 16	2.5 - 3.8	9	4
SUB-28-4.5-PAK	4.5"	114*	14 - 28	3.5 - 6.5	11	4
SUB-8-5-K	5	127	3 - 8	0.7 - 1.8	12	5
SUB-12-5-K	5	127	5 - 12	1.0 - 3.0	12	5
SUB-16-5-K	5	127	10 - 16	2.5 - 3.5	12	5
SUB-28-5-K	5	127	14 - 28	3.0 - 6.5	15	7
SUB-52-5-K	5	127	24 - 52	5.5 - 12.0	20	9
SUB-99-6-K	6	153	48 - 99	11.0 - 22.5	23	10

### General Specifications:

- Maximum Particle Size: 1/4 inch (6mm)
- Maximum Particle Concentration: 500 ppm
- Minimum Depth of Well Below Separator Setting: 20 feet (6.1 m)
- Minimum Submergence of Separator: 30 feet (9.2m) below pumping draw down water level

\* *NOTE: All -SUB-PAK Models are designed to accommodate the typical pump diameter of 3-3/4 inches (95 mm). Maximum length of pump motor and inlet screen area (combined) cannot exceed 38 inches (965 mm). Consult factory for special requirements and/or application assistance and for other sizes.*

*Standard Pump Enclosure Shell is 48 inches (1219 mm) long. Shells also available in longer lengths (contact factory).*

**For 4" and 4.5" Diameter Wells**

**SUB-PAK**

**For 5" and Larger Wells**

**SUB-K**

**SUB-PAK Seals**

For 4-inch and 4.5-inch diameter wells only

Each SUB-PAK Separator includes a Drawdown Seal (attaches to pump outlet) and Sub Seal (attaches to outlet of separator). These replace the SUB-K model Pump Enclosure Shell. Different connection sizes for the Drawdown Seal are provided, depending on the well ID and/or the pump's riser size. Please note:

- SUB-PAK Separators for 4-inch well ID available with either 1-inch or 1-1/4-inch riser connection to match pump riser size
- SUB-12-4.5-PAK and SUB-28-4.5 PAK Separators for 4-1/2-inch well ID available only with 1-inch riser connection (ask about other options)
- SUB-8-4.5-PAK for 4-1/2-inch well ID available only with 1-1/4-inch riser connection (ask about other options)

The SUB-Seal (which attaches to the SUB-K Series Separator) has a 2-inch FNPT connection size on all models except SUB-28, which features a 2-1/2-inch FNPT connection size.

SUB-K Separator and Shell

- SUB-08-4-K Pump Protection Separator
- SUB-08-5-K Pump Protection Separator
- SUB-12-4-K Pump Protection Separator
- SUB-12-5-K Pump Protection Separator
- SUB-16-4-K Pump Protection Separator
- SUB-16-5-K Pump Protection Separator
- SUB-28-4-K Pump Protection Separator
- SUB-28-5-K Pump Protection Separator
- SUB-52-5-K Pump Protection Separator
- SUB-99-6-K Pump Protection Separator

**Separator, Shell and Internal Deflector Plate**

PVC composites and ABS. Seal on shell is ethylpropylene rubber with stainless steel clamp.

**Flapper Valve**

Fabric-reinforced neoprene rubber

**Drawdown Seal**

Ethylpropylene rubber on a zinc-plated steel coupling. Connection size: 1-inch and 1-1/4 inch female, N.P.T.

**Sub Seal**

Nitrile rubber on a steel merchant's coupling.

**Dimensions**

Model	Length of Separator	
	in.	mm
SUB-8-4-PAK*	36.50	927
SUB-12-4-PAK*	36.50	927
SUB-16-4-PAK*	36.50	927
SUB-28-4-PAK*	40.75	1035
SUB-8-5-K	36.50	927
SUB-12-5-K	36.50	927
SUB-16-5-K	36.50	927
SUB-28-5-K	40.75	1035
SUB-52-5-K	43.75	1111
SUB-99-6-K	50.00	1270

**SUB-K**

5-inch and larger wells ONLY

**SUB-PAK**

4-inch and 4.5-inch wells ONLY

**SUB-KOOL Pump Motor Cooling Shroud**

Simple, economical, and effective, the SUB-KOOL shroud is available in three sizes for your pump cooling requirements. All models designed for standard 3-3/4 inch diameter pumps. Select shroud size according to your pump flow requirements.

- Easy to install
- Lightweight
- Corrosion-free composite materials

Model	Length	Inner and Outer Diameter	
SUB-KOOL-4	48 in (1219 mm)	I.D. 4-1/5 in. (107 mm)	O.D. 4-1/2 in. (114 mm)
SUB-KOOL-5	51-3/4 in (1314 mm)	I.D. 4-1/5 in. (107 mm)	O.D. 6-1/8 in. (156 mm)
SUB-KOOL-6	51-3/8 in (1305 mm)	I.D. 4-1/5 in. (107 mm)	O.D. 7-1/2 in. (191 mm)
